SHERLYS DISTRIBUTION & AGENTS OS

BUSINESS PROCESS & AUTOMATION BLUEPRINT

Document Overview

This blueprint describes five operational workflows for Sherlys Distribution & Agents: Order to Delivery, Damage Management, Stock Receiving, Daily Stock Verification, and Stock Refill Request. Each module is documented with a Flow ID register and a corresponding process-flow diagram. The diagrams show responsible teams, key operational decisions and handoffs between modules.

PROJECT OVERVIEW & PERSONAS

Five operational modules | Separate sales and delivery responsibilities

BRANCH	MODULE	PURPOSE
01	Order to Delivery	Shop order verification, delivery note, godown picking, vehicle assignment, invoice note, signed invoice and distribution.
02	Damage Management	Six damage situations across stock refill, unloading, storage, loading, transit and in-shop/expired goods.
03	Stock Receiving	Receive goods from FMCG suppliers; count, separate damage, allocate by Godown/Zone/Crate, verify and post.
04	Daily Stock Verification	Physical count against recorded stock, mismatch reporting, recount, approval and controlled adjustment.
05	Stock Refill Request	Low-stock threshold or additional demand, Accounts request, Admin approval, FMCG supply and receiving handoff.

Personas & Responsibilities

ID	PERSONA	DESCRIPTION
01	Admin	Monitors all modules and activities and approves stock refill requests.
02	Accounts	Verifies shop orders, prepares billing documentation and stock refill requests.
03	Godown Manager	Oversees godown products, expiry-aware picking, stock checks and delivery assignments.
04	Salesperson	Sells products to shops, develops new shops and expands the distribution network.
05	Delivery Person	Delivers requested products correctly to shops with the relevant invoice/documentation.
06	Store Keeper	Handles stock receiving, physical counts, allocations, damage separation and loading support.

BRANCH 01 | ORDER TO DELIVERY

Flow ID register | Process activity and descriptions

FLOW ID	FLOW NAME	DESCRIPTION
ORD-01	Order request	Receive product order from shop through Salesperson, Accounts, telecalling or enquiry.
ORD-02	Accounts verification	Verify shop request and availability; hold invalid requests for correction.
ORD-03	Delivery note	Generate delivery note for approved requested products.
ORD-04	Godown handover	Pass delivery note to Godown Manager.
ORD-05	Stock preparation	Pick goods based on expiry and first-in receipt sequence (FEFO/FIFO).
ORD-06	Delivery assignment	Assign vehicle and Delivery Person for the goods.
ORD-07	Invoice note	Prepare invoice note based on actual loaded goods and send to Accounts.
ORD-08	Final invoice	Accounts creates, signs/seals and hands final invoice to Delivery Person.
ORD-09	Shop delivery	Deliver requested products correctly to shops and record outcome.

Corresponding BPM process-flow diagram follows in the diagram section.

BRANCH 02 | DAMAGE MANAGEMENT

Flow ID register | Process activity and descriptions

FLOW ID	FLOW NAME	DESCRIPTION
DMG-01	Stock refill damage	Identify and separate goods damaged in manufacturer supply/refill movement.
DMG-02	Unloading damage	Identify damaged products while unloading into godown.
DMG-03	Godown storage damage	Identify goods damaged while in storage.
DMG-04	Vehicle loading damage	Identify products damaged during loading.
DMG-05	Transit damage	Identify products damaged during shop deliveries.
DMG-06	In-shop / expired products	Record damaged or expired products returned from shops.

Corresponding BPM process-flow diagram follows in the diagram section.

BRANCH 03 | STOCK RECEIVING

Flow ID register | Process activity and descriptions

FLOW ID	FLOW NAME	DESCRIPTION
STK-01	Arrival	FMCG company goods arrive at the godown.
STK-02	Document and count	Check supplier document and physically received quantities.
STK-03	Damage or variance	Identify quantity differences and isolate damaged cases.
STK-04	Location allocation	Assign accepted stock to Godown, Zone and Crate.
STK-05	Verification	Godown Manager verifies receipt and allocations.
STK-06	Inventory posting	Only accepted and verified cases enter available inventory.

Corresponding BPM process-flow diagram follows in the diagram section.

BRANCH 04 | DAILY STOCK VERIFICATION

Flow ID register | Process activity and descriptions

FLOW ID	FLOW NAME	DESCRIPTION
DSV-01	Checking scope	Select godown, zone and crates to verify.
DSV-02	Physical count	Count products and enter physical quantity.
DSV-03	Mismatch decision	Compare counted stock with system balance.
DSV-04	Report discrepancy	Inform responsible authority when mismatch is detected.
DSV-05	Daily snapshot	Capture daily stock-check summary and evidence.
DSV-06	Recount / supervisor review	Recount mismatched stock and review with supervisor.
DSV-07	Controlled correction	Make a controlled stock adjustment only when authorized.

Corresponding BPM process-flow diagram follows in the diagram section.

BRANCH 05 | STOCK REFILL REQUEST

Flow ID register | Process activity and descriptions

FLOW ID	FLOW NAME	DESCRIPTION
REF-01	Refill trigger	Detect below-threshold stock or additional demand.
REF-02	Accounts request	Prepare FMCG brand-specific quantities and SKUs.
REF-03	Admin submission	Send refill request to Admin for authorization.
REF-04	Admin decision	Approve, hold or reject refill request.
REF-05	Supplier request	Send approved request to FMCG company.
REF-06	Supplier dispatch	FMCG company dispatches products to godown.
REF-07	Receiving handover	Branch 03 counts, verifies and posts actual accepted stock.

Corresponding BPM process-flow diagram follows in the diagram section.

BRANCH 01 | ORDER TO DELIVERY

Order request to invoice handover and final shop delivery

ORD-01
Receive shop product order
Salesperson / Accounts

↓

ORD-02
Verify shop request and stock
Accounts

HOLD →

HOLD / CORRECTION
If verification fails, return the request for correction.
Accounts

↓

ORD-03
Generate delivery note
Accounts

↓

ORD-04
Send delivery note to Godown Manager
Accounts

↓

ORD-05
Prepare goods using expiry-aware picking
Godown Manager

↓

ORD-06
Assign vehicle and Delivery Person
Godown Manager

↓

ORD-07
Create loaded-goods invoice note
Godown Manager

↓

ORD-08
Sign/seal final invoice and hand over
Accounts

↓

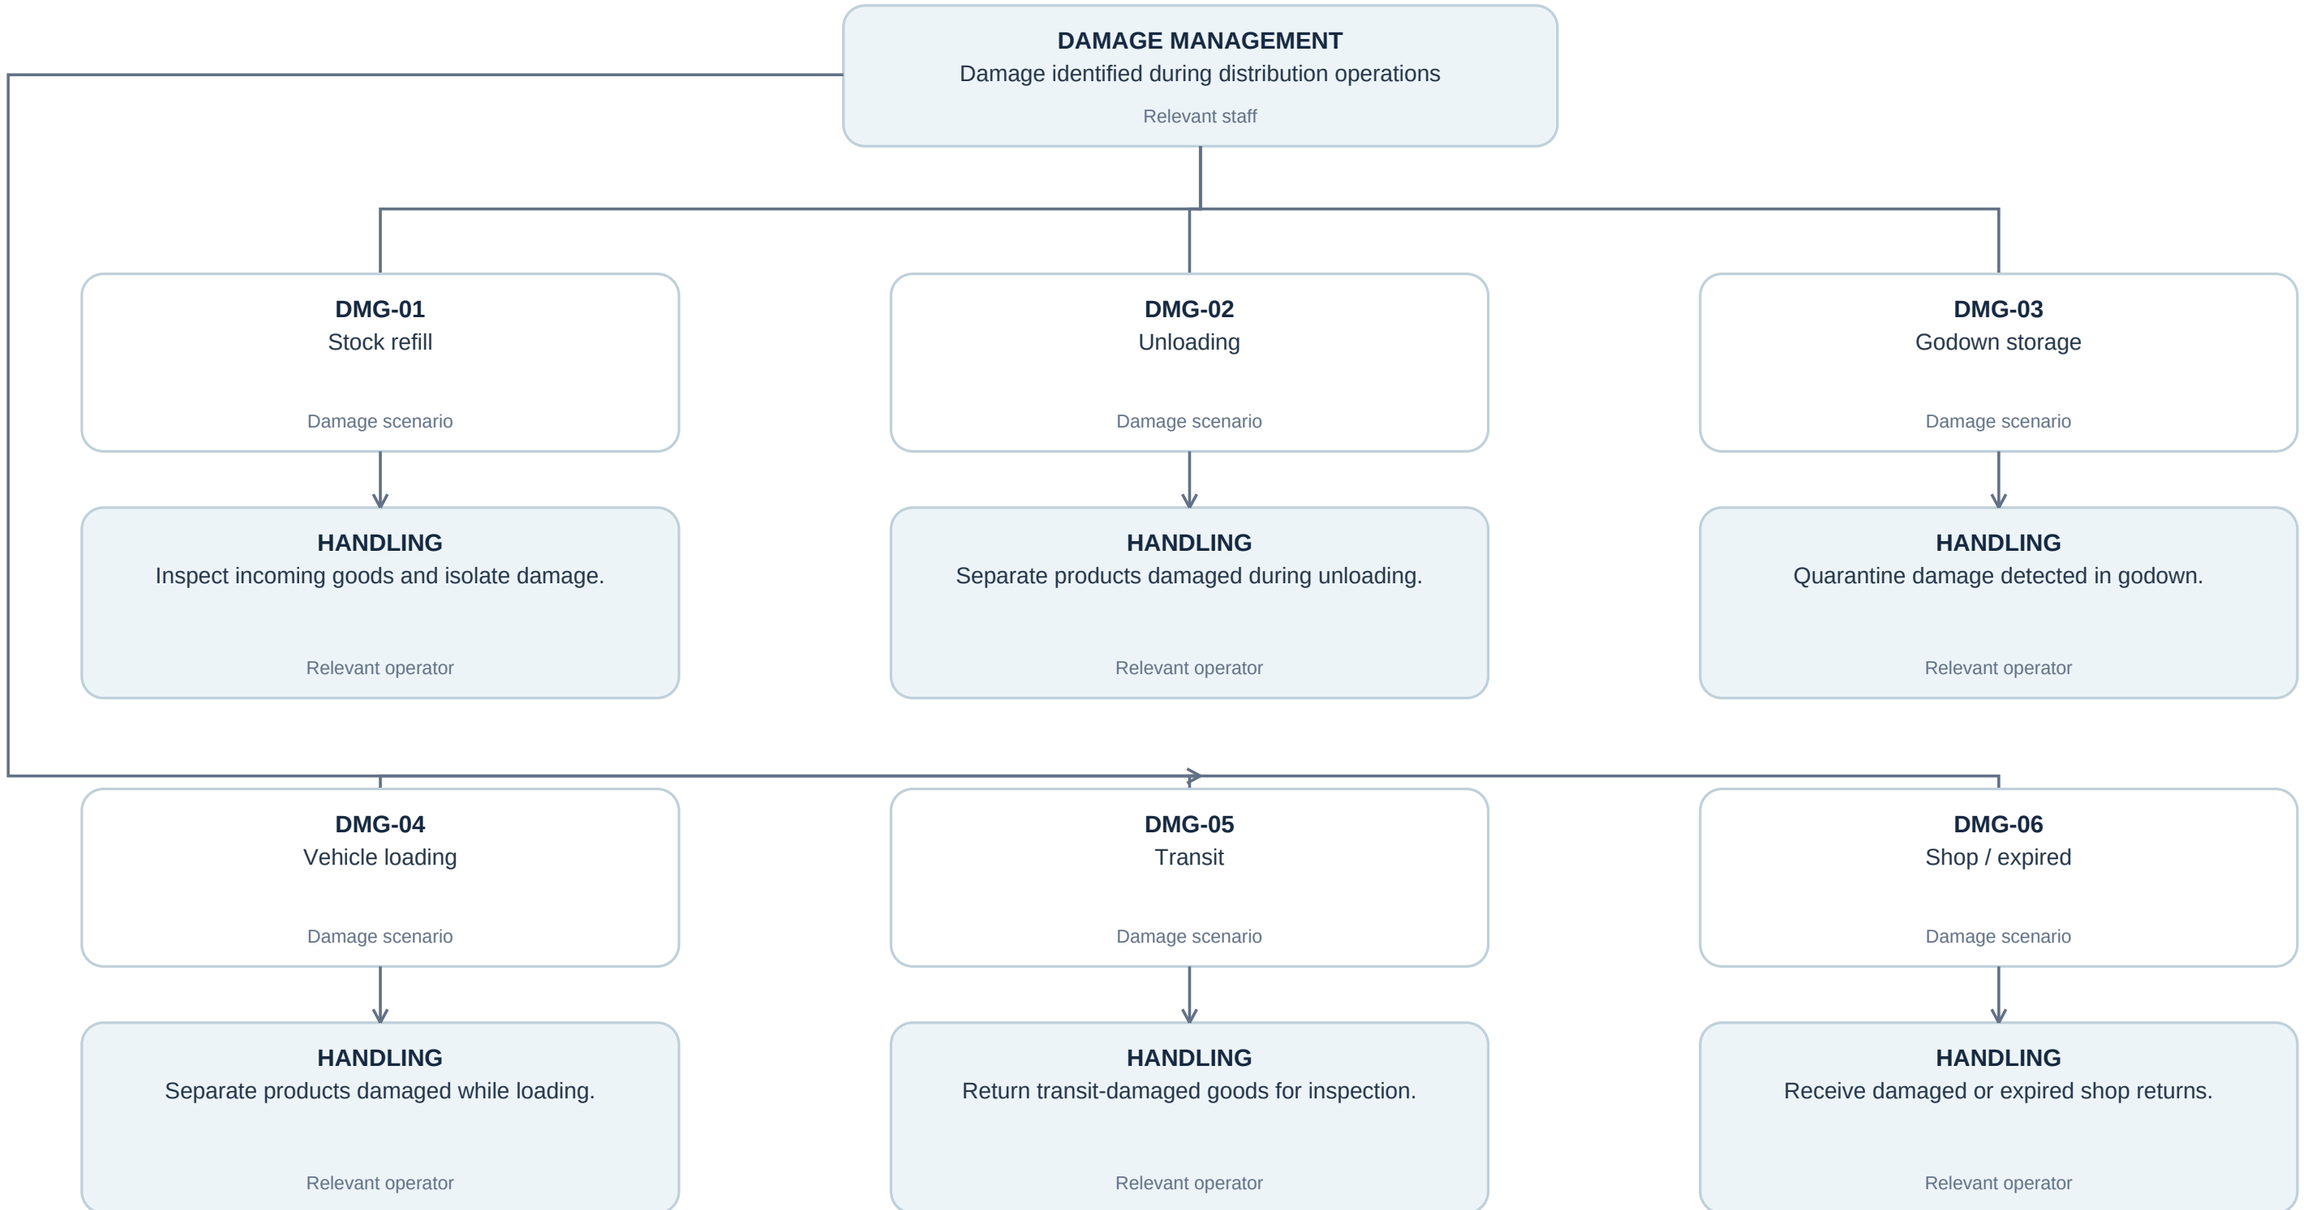

ORD-09
Deliver products to shops
Delivery Person

PICKING POLICY
Check expiry and stock-receipt order when selecting goods.
Godown Manager

DOCUMENT SEQUENCE
Delivery note -> invoice note -> signed/sealed final invoice.
Accounts / Godown

BRANCH 02 | DAMAGE MANAGEMENT

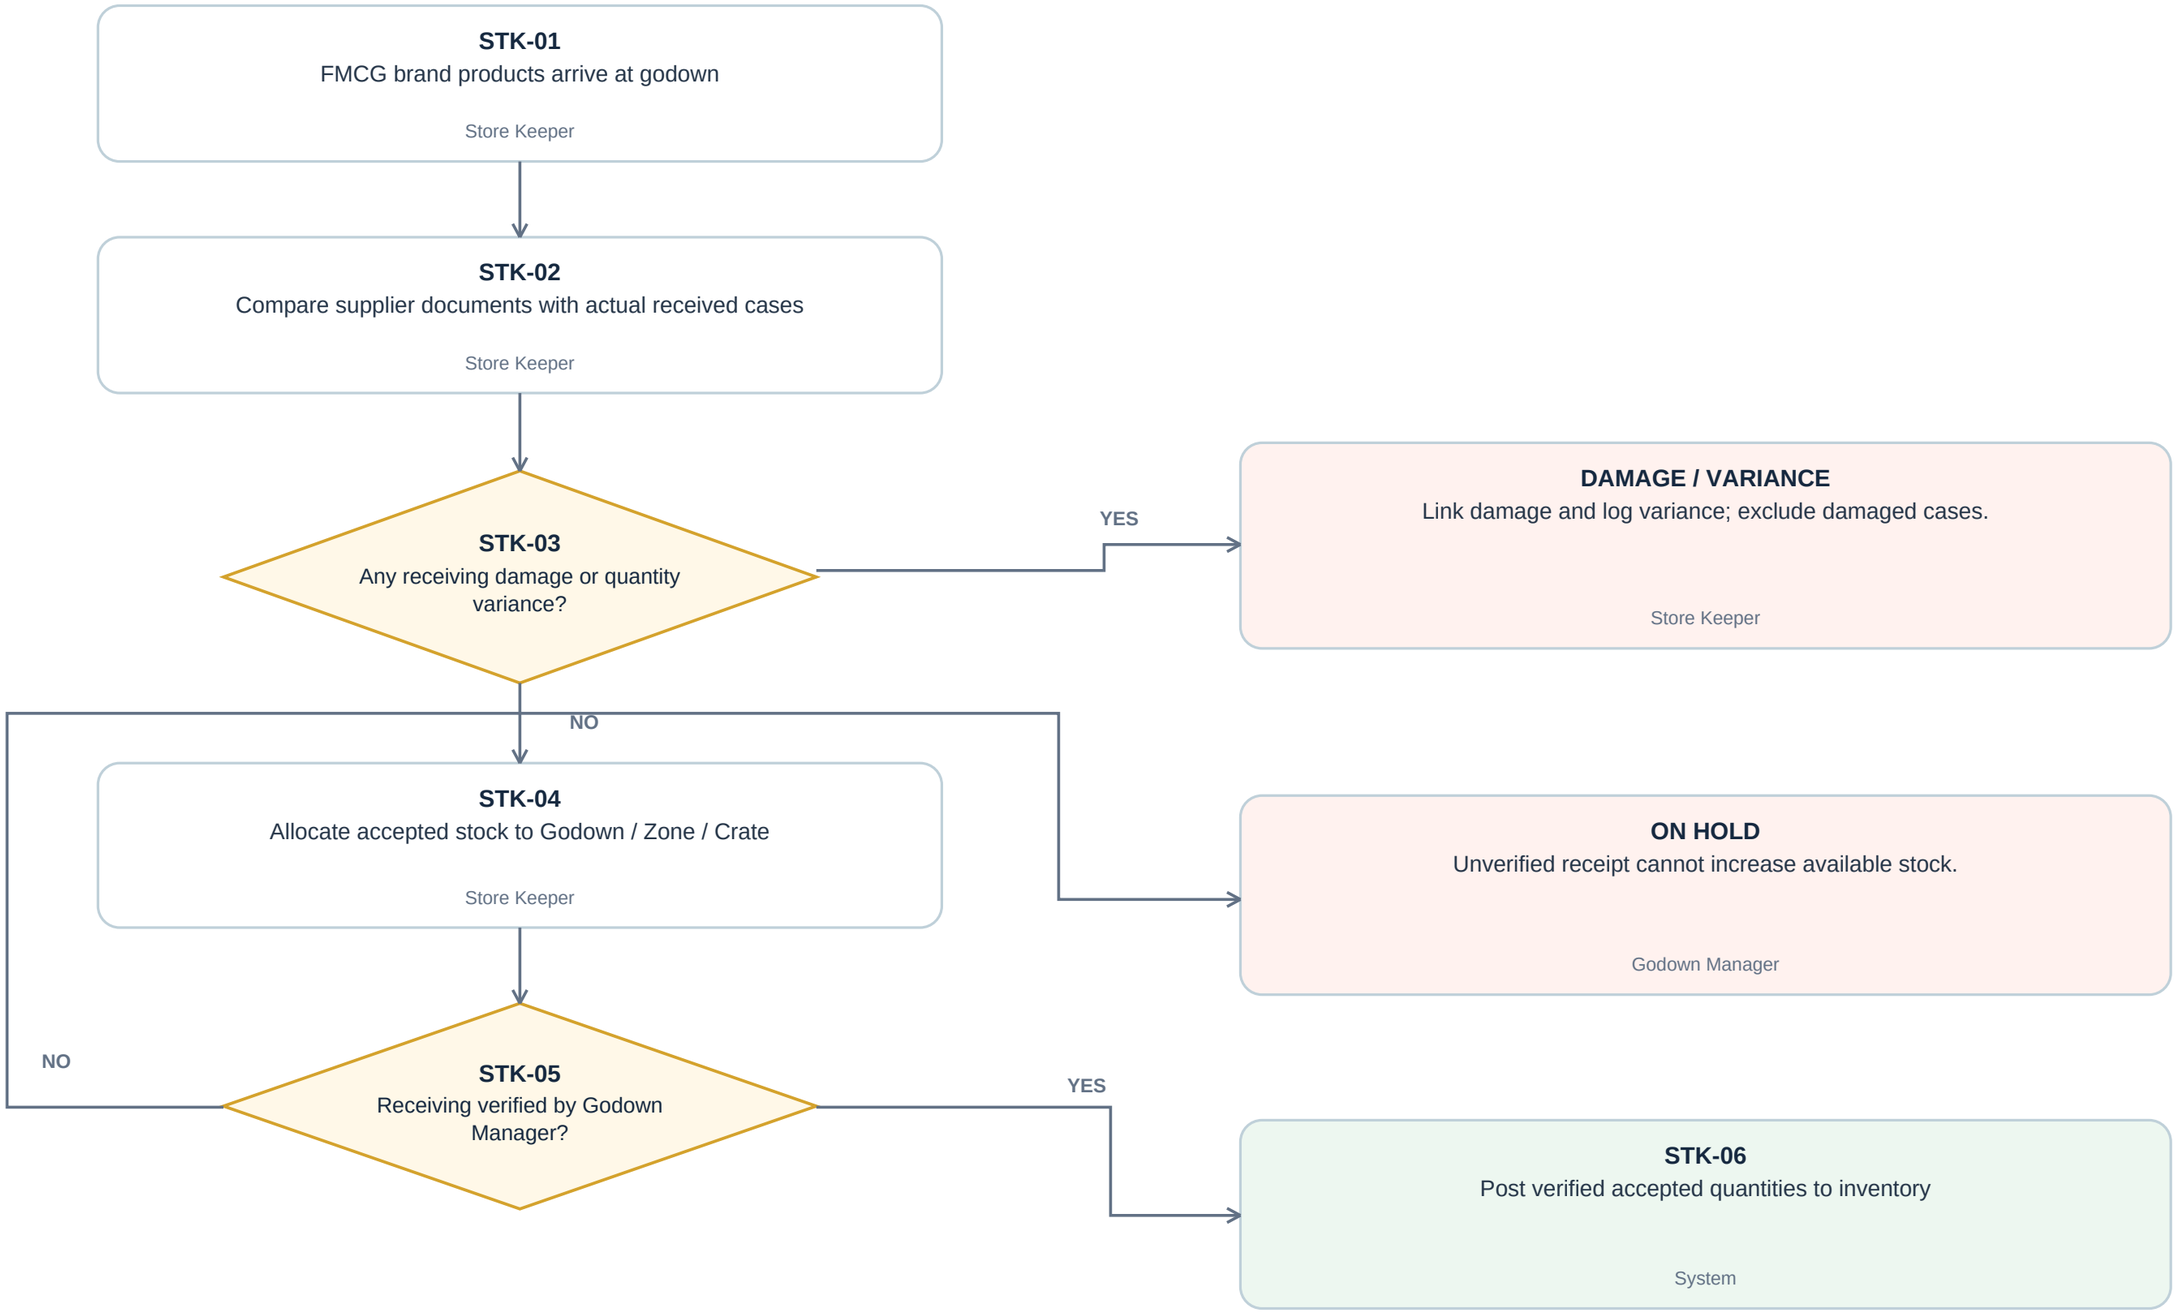

Six detection situations | Individual damage-handling actions

Damaged or returned goods remain unavailable for sale until verified disposition.

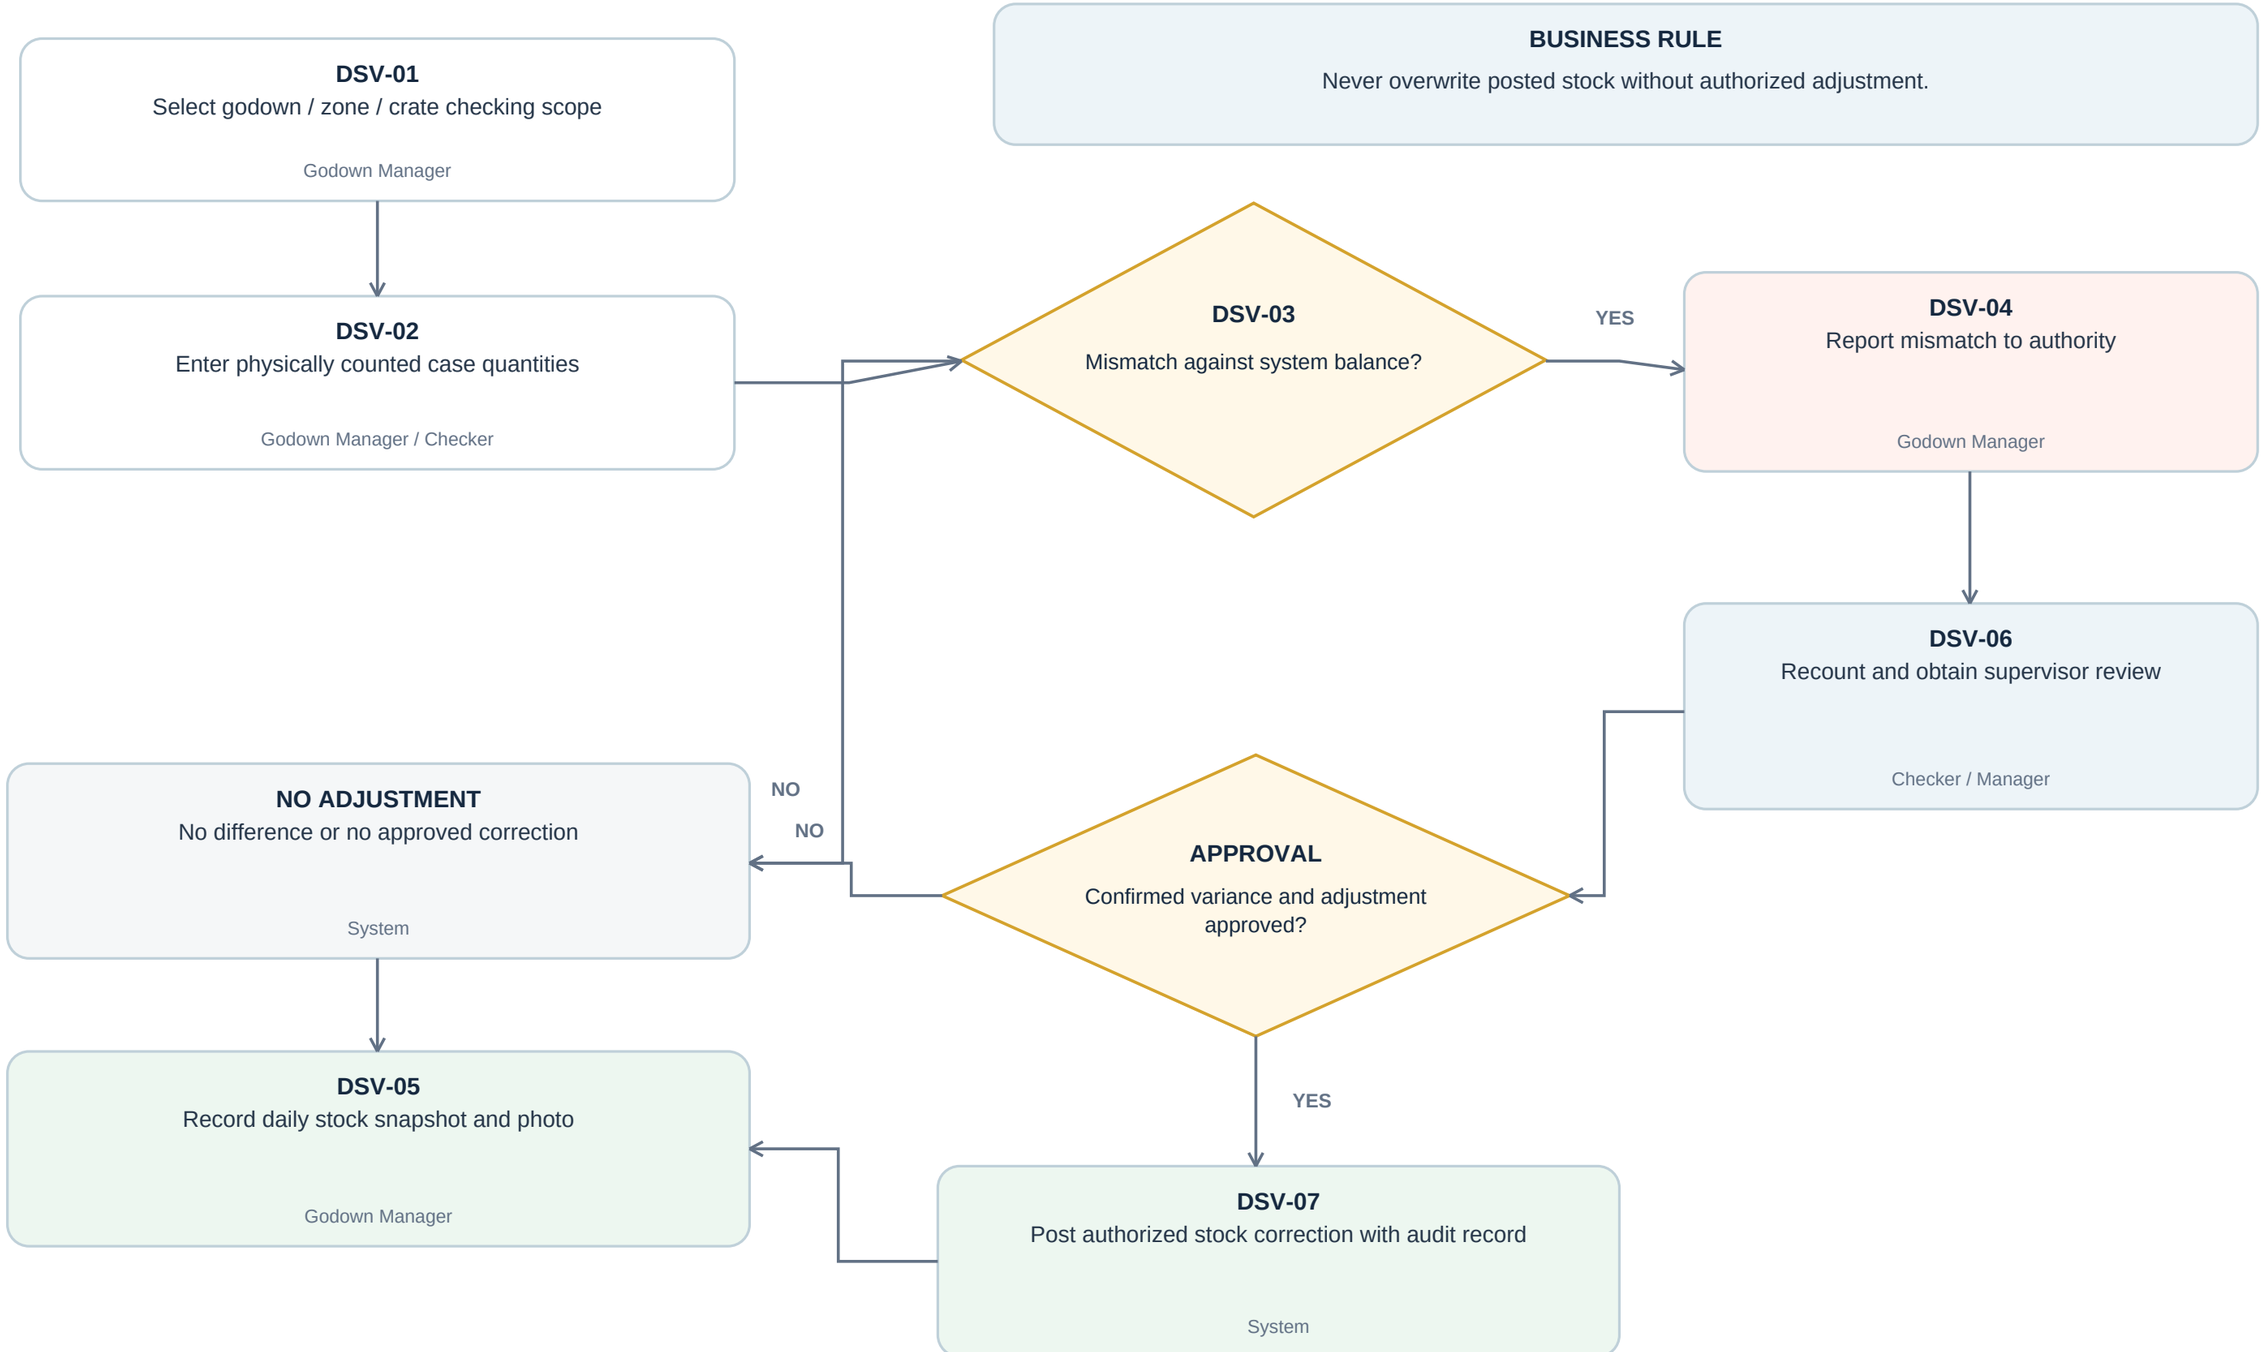

BRANCH 03 | STOCK RECEIVING

Supplier goods -> physical count -> allocation -> verification -> usable inventory

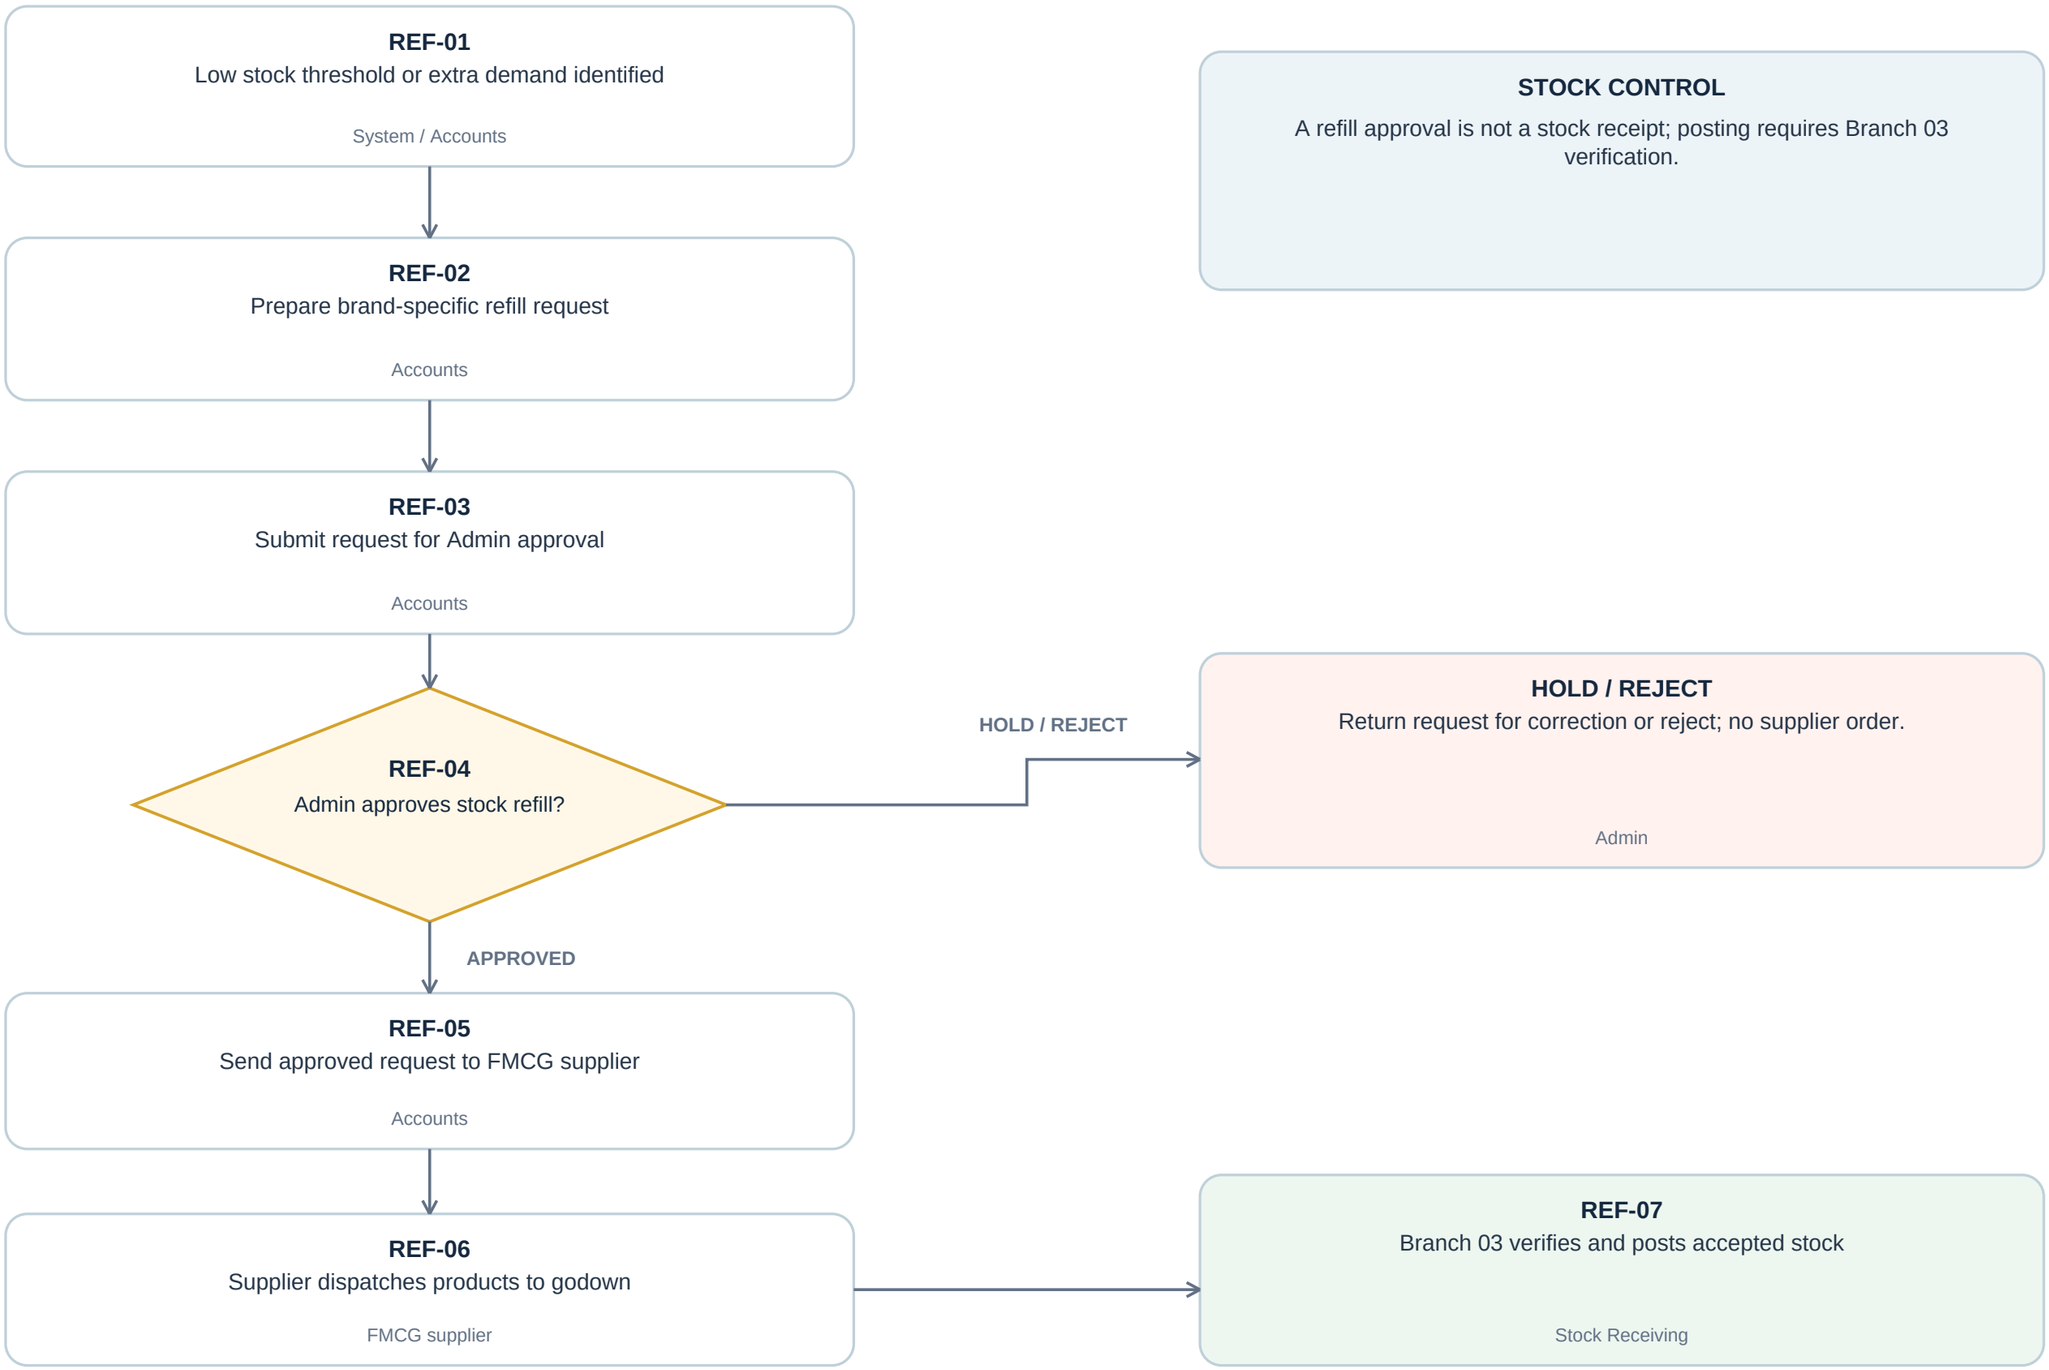

BRANCH 04 | DAILY STOCK VERIFICATION

Daily count -> mismatch decision -> recount and approval -> audit snapshot

BRANCH 05 | STOCK REFILL REQUEST

Threshold or extra demand -> Accounts -> Admin -> FMCG brand -> Branch 03

STOCK CONTROL

A refill approval is not a stock receipt; posting requires Branch 03 verification.
